ABSTRACT:

Alumni Reference System for placements is useful for students to get placed in companies. It aims at making the process of knowing the guidelines to get the job in the companies easy. By knowing the guidelines, the student can understand and analyze the process of placements of the particular company.

Normally, a student who wants to get placed in a certain company has to search details about the company & it is difficult. It consumes lot of time & also it does not provide clear information about the placements. Through this paper, the students can get the information from seniors easily.

In the existing system by contacting the TPO and we get the seniors information. But we don't get the

entire information about seniors who selected for placements. We can get little bit information about placements. To overcome this problem we proposed alumni reference system for placements.

The proposed system contains information about senior students who are recruited for campus drives. By using this proposed system we get clear details about companies by contacting them. . This project is to give the information to the students about the senior students who got placed in different companies. As the senior students who are already placed have experienced the placements & got placed they can provide the tips to the students who got registered in this website.

novel, useful and understandable patterns in large databases. The patterns must be actionable so they may be used in an enterprise's decision making.

1. Efficient automated discovery of previously unknown patterns in large volumes of data.

INTRODUCTION

DATA MINING:

Data mining is a collection of techniques for efficient automated discovery of previously unknown, valid,

2. Patterns must be valid, novel, useful and understandable.

3. Businesses are mostly interested in discovering past patterns to predict future behaviour.

Data Mining Uses:

- Fraud or compliance anomaly detection
- Intrusion Detection
- Lie Detection Fraud
- Market Basket Analysis

Customer segmentation and targeted marketing. Coming to our project traditionally, if a student wants the information about the senior students & they has to go to TPO & collect the information about senior students & then contact seniors. Though this they may contact only one or two seniors & can get a little information.

By using this Alumni Reference System for Placements, the student has to get registered first. Then they login into this website and they can view the senior profiles who are recruited in placements. They can get the guidelines provided by the senior students about the companies. Through these guidelines they can get required & correct information about the companies & the placements. They gets a lot of information through this website & after they gets the required information and they can logout.

TPO helps the students who got register through this website. For this, he has to login in to this website. TPO uploads the information about the senior students who got placed. After that he uploads the placements, so that students can view it. TPO uploads all the information of seniors who got placed. TPO validates the information about the senior students who login in to the software.

If a student contact seniors through this website, many no. of senior students who gets login in to this provide the information to students about the vacancies & process of placements. So, this is really helpful for students to make the process getting placed very easy through the senior students.

RELATED WORK

It aims at making the process of placements for a student easy and comfortable. A student can easily get placed in companies if he has proper guidance. Keeping this point in view seniors who are already placed in companies are made guides in our project. By getting registered in to this website a student can get lot of benefits like the contact details of

These seniors, suggestions by seniors information about the company in an easy way. Through this the student

can get guidelines so that they can be selected in the placements easily. Seniors have a login form in which they can view the details of the student who got registered in this website. They can enter their guidelines there. They can also view the guidelines given by other senior student, which may help in their job career. This is very useful for the students. It really makes the students know the path of success.

This process is helpful in making the college name more reputed for placements. The college authorities feel happy for making more number of their students get placed.

EXISTING SYSTEM:

The existing procedure of getting details about the placed students is the student must have to go to TPO and collect the information of senior students who got placed. The student can't get the whole information and necessary guidelines through this. He gets only a little information about seniors. He can't get proper guidelines. Student needs to take lot of effort to get the details of the placed students. We can't contact more number of students. If they want to get the whole information about the particular company they need to search many websites.

DISADVANTAGES:

1. It takes more time.
2. We can't get the proper guidelines.

3. Student has to put more effort for gathering information.

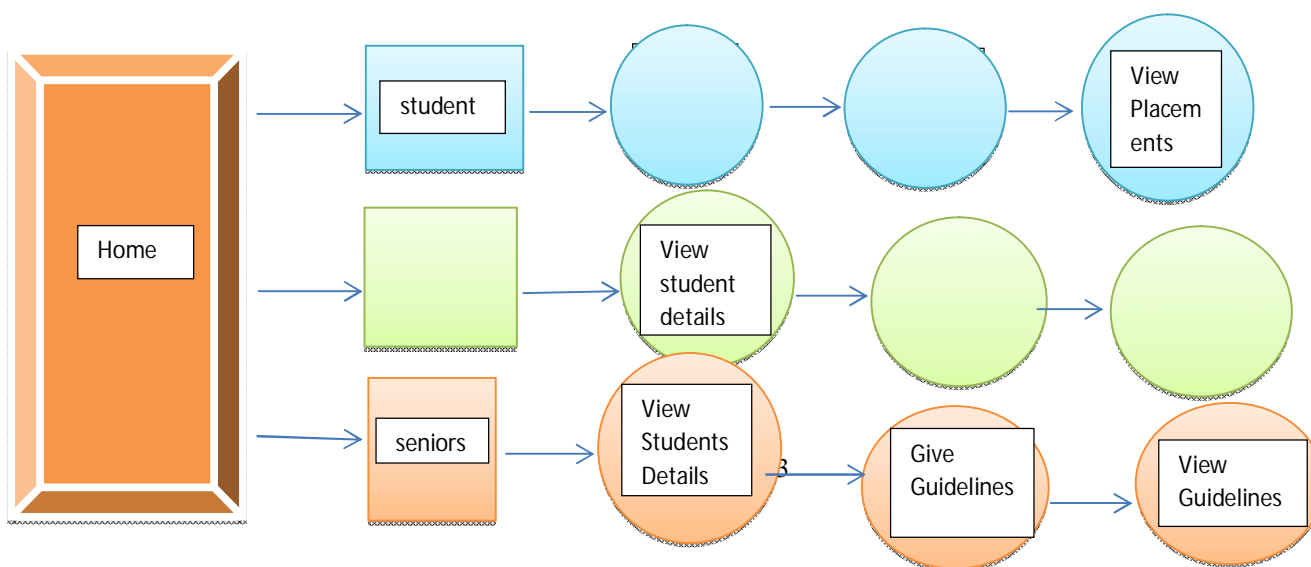

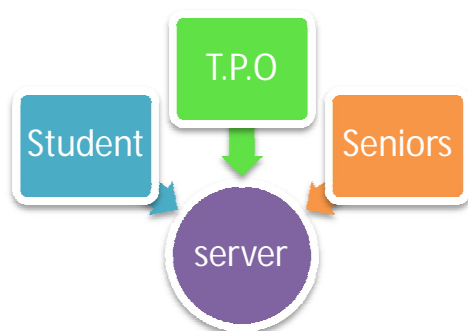

PROPOSED SYSTEM:

This website overcomes the difficulties of the existing system. This is the easy way for contacting the seniors and getting the information about the placements, thereby reducing the manual work and also saves the time. Only our college students can use this, so that we can increase the no. of students get placed. They can get more information about the placements. Its make them get placed easily.

ADVANTAGES:

1. Easy in process.
- 2.Saves the time.
- 3.It helps the students to get proper guidelines.
- 4.It makes the student to know the process of placing in a company.

SYSTEM ARCHITECTURE

PROCEDURE:

Student:

Register-Student has to get registered to use this website like name, phone no,email id etc...

Login-After registration the student can login in to this website.

Seniors:

Login-Seniors has to login into this website

View students-They can view the registered students into this website

Give guidelines-They can enter the guidelines useful for the students

View guidelines-Seniors can view the guidelines given by other seniors also

Logout-Then they can logout

FUTURE ENHANCEMENTS:

This application is very useful for the students and make them go in a proper way which makes them get placed easily. This application is not only used for the students for the students but also for the institution to make their students get placed. By increasing the number of senior student details more information can be gathered.

Conclusion:

We know that student must have to do a lot of work in order to get placed. He has to do a lot of manual work to get information about senior student to guidelines from them. So this website is must in order to help the students. In future, definitely we must use this website in order to see more number of students get selected in placements.
